

Y2 Knowledge Organiser – Around the world

In Geography year 2, students will learn about the continents and oceans of the world. They will understand that the world is spherical and correctly name the seven continents and five oceans. Using an atlas and world map, they will accurately locate the continents, oceans, and their own country. Students will learn that journeys can be made around the world and follow a simple journey line using key vocabulary. They will locate hot and cold areas of the world and use compass directions (NESW) to follow routes on a map. Using aerial photographs and satellite images, they will recognise basic human and physical features. Students will ask geographical questions, describe simple features, and name countries of the world. They will understand and locate simple climate zones and make comparisons between different places.

Unit overview

Children will develop global awareness by looking in detail at the position of

the seven continents and five oceans of the world, understanding that the world is spherical and creating their own journeys across the world.

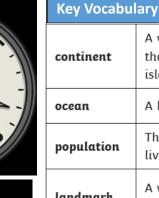

Children continue to build on their map skills developed in Year 1 using atlases, world maps and globes more widely, along with using

photographs to recognise human and physical features including landmarks.
